|  |           |                | Magliano, Dianna |       |       |

### **Blue Circle Voices**

Blue Circle Voices (BCV) is an IDF initiative that aims to represent the interests of people of all ages living with or affected by diabetes, through a worldwide network of members and other stakeholders. The BCV network draws upon the experiences of people with diabetes and acts as their global voice. Consulting with BCVs helps foster better understanding of the issues and challenges that people with diabetes encounter in our world today to inform the strategies necessary to meet the varying needs of people with diabetes worldwide.

More information: [www.idf.org/our-network/blue-circle-voices](http://www.idf.org/our-network/blue-circle-voices)

### **IDF Type 2 Diabetes and Cardio-Renal Complications programme**

The IDF Type 2 Diabetes and Cardio-Renal Complications programme was created to provide global data on the prevalence, quality of care and outcomes for people living with diabetes that have cardiovascular and renal complications. The programme aims to improve access to diabetes registries for healthcare professionals in low- and middle-income countries and raise awareness of the risk and potential consequences of cardio-renal complications in people with diabetes.

More information:  
[www.idf.org/what-we-do/epidemiology-and-research](http://www.idf.org/what-we-do/epidemiology-and-research)

### **IDF Centres of Excellence in Diabetes Care**

An IDF Centre of Excellence is a clinical or research institute designated by IDF to form part of an international collaborative voluntary network to initiate, coordinate, facilitate and conduct holistic diabetes service and multidisciplinary education in diabetes and other related chronic diseases. Over 20 centres are currently recognised in six IDF regions.

More information:  
[www.idf.org/our-activities/education/centres-of-excellence](http://www.idf.org/our-activities/education/centres-of-excellence)

### **IDF Diabetes Atlas**

The IDF Diabetes Atlas is the authoritative source of evidence on the impact of diabetes worldwide. First published in 2000, it delivers essential information on the estimated and projected global, regional and national prevalence of diabetes for an audience of healthcare professionals, academics, advocates and policy makers. The 11th edition of the IDF Atlas will be launched at the IDF Congress 2025 in Bangkok.

More information: [www.diabetesatlas.org](http://www.diabetesatlas.org)

### **IDF-GHU Diabetes Training**

Launched in 2023, this partnership with Sanofi Global Health Unit aims to enhance the diabetes knowledge and skills of healthcare professionals in 40 of the world's most under-served countries. In its initial phase, the partnership aims to provide online training for 1,500 healthcare professionals and in-person training targeting 2,500 healthcare professionals in five countries.

More information: [www.idf.org/what-we-do/education/idf-sanofi-strategic-diabetes-training-collaborations/](http://www.idf.org/what-we-do/education/idf-sanofi-strategic-diabetes-training-collaborations/)

### **IDF School of Diabetes**

The IDF School of Diabetes was launched in 2016 to deliver high-quality, evidence-based online diabetes education for health professionals. Since then, it has grown to engage a community of over 100,000 healthcare professionals from more than 200 countries and territories. Accredited by the European Accreditation Council for Continuing Medical Education (EACCME), the IDF School of Diabetes offers a selection of free and paid courses, bringing training across all regions, and more importantly, making high standard, evidence-based education accessible in low and middle-income countries. In 2022, the IDF School of Diabetes launched the Understanding Diabetes platform to provide free online education to people living with diabetes and their caregivers.

More information: [www.idfdiabeteschool.org](http://www.idfdiabeteschool.org);  
[www.understandingdiabetes.org](http://www.understandingdiabetes.org)

### **IDF Young Leaders in Diabetes**

IDF Young Leaders in Diabetes (YLD) is a unique programme that brings together young people living with diabetes to learn from each other and share experiences to improve the lives of people affected by the condition. The programme identifies and supports the development of young leaders within the international diabetes community, empowering and educating them to support IDF's mission through close collaboration with IDF members. A new cohort of IDF Young Leaders will be trained at the IDF Congress 2025 in Bangkok.

More information: [www.idf.org/our-network/young-leaders](http://www.idf.org/our-network/young-leaders)

### **Kids and Diabetes in Schools (KiDS)**

Launched in 2013, the Kids and Diabetes in Schools (KiDS) programme aims to facilitate a safe and supportive school environment for children with diabetes, and promote healthy habits to help prevent type 2 diabetes from a young age. Target groups include children aged 6–14, teachers, school staff, parents and policy makers. KiDS offers a selection of multilingual resources that can be adapted for use in schools at local and national level. The KiDS programme has been implemented in 21 countries, engaging 687,000 children and 27,000 teachers.

More information: [kids.idf.org](http://kids.idf.org)

### **World Diabetes Day (WDD)**

World Diabetes Day (WDD) – marked every year on 14 November – is the world's largest diabetes awareness campaign reaching a global audience of over 1 billion people in more than 160 countries. The campaign highlights issues of paramount importance to the global diabetes community and keeps diabetes firmly in the public spotlight. It aims to be the global driver for change to reduce the significant human and economic impact of diabetes and improve the lives of people affected by the condition. The current theme for World Diabetes Day is diabetes and well-being.
